18+ yrs QA Expert | Automation Architect – Selenium, Playwright, API & CI/CD | ISTQB + Scrum Certified

About Me (Profile Bio)

I'm a results-driven QA Manager & Test Solution Architect with 15+ years of experience across Healthcare, FinTech, Crypto, ERPs like Salesforce, Oracle HRMS and Telecom. I specialise in building **scalable, reusable automation frameworks**, integrating them into CI/CD pipelines, and leading QA transformations that cut costs and speed up releases.

Delivered in last 5 years

- Data Migration Testing from SQL to Databricks for Simetrics
- 60% reduction in manual testing efforts through API-driven automation for Walmart TMS
- End-to-end data validation & regulatory compliance for Brit Insurance (SQL + Databricks)
- 50% faster test execution for GE Salesforce via distributed testing on AWS
- Custom hybrid frameworks (SHAFT) reducing dev time by 80% for JLT Group
- Mobile Testing for crypto domains company like Nash and Cryptography

Key Skills

- **Automation Tools:** Selenium, Playwright, HP UFT, JMeter, Ready API
- **Languages:** Java, C#, Python, SQL
- **Frameworks & CI/CD:** TestNG, Maven, Jenkins, GitLab CI, AWS
- **API Testing:** Postman, Rest Assured, Ready API
- **Test Management Tools:** Azure DevOps, Jira, TestRail, TFS
- **Approaches:** Functional, Regression, Integration, Performance, UI & API Testing
- **Soft Skills:** Agile/DevOps, KPI tracking, mentoring teams, stakeholder communication

Services I Offer on Freelancer Platforms

- End-to-end QA strategy & planning
- Manual & automation testing (web, mobile, API)
- Test automation framework design & integration into CI/CD
- Performance, Data migration & regression testing
- KPI dashboards, defect management & reporting
- Mentoring QA teams / building TCoEs

If you're looking for a QA expert who can **reduce defects, accelerate releases, and align testing with your business goals**, let's talk.
